

OUTPATIENT CARDIOLOGY SPECIALIST CONSULTATION NOTE

Patient Name: Eleanor Vance

Date: 08/19/2026

CLINICAL IMPRESSION & REVISED PLAN:

Reviewed patient's recent hospitalization for CHF exacerbation. Adjusting home management plan.

MEDICATION ADJUSTMENTS:

1. Furosemide (Lasix): Change dosing schedule to 20mg twice daily (morning and late afternoon) to improve diuresis stability throughout the day.
2. Lisinopril 10mg: Continue standard once daily dosing.

CARE INSTRUCTIONS:

- Fluid Restriction: Patient is allowed up to 2.0 Liters per day if serum sodium levels remain stable.

FOLLOW-UP SCHEDULING:

- Re-evaluation required in clinic within 7 days to monitor kidney function labs.
